Policy and Condition

The following are the policies and condition for shipment on SAPX.

Weight Policy

SAPX has its own weight policies. The standard weight policies in SAPX are as follows :

1. SAPX will consider the heavier of volumetric weight and actual weight as the shipment weight
2. SAPX will round up the weight if the fraction $\geq$ (greater than or equal to) .3 and if the fraction less than .3 it will round down. For example, if the weight is 1.3 kg. SAPX will round it up to 2 kg.
3. All services on SAPX have minimum weight. Please refer to get shipment publish cost endpoint or discuss it with SAPX Sales PIC
4. SAPX uses kilograms (kg) as the units of measurement for weight

Shipping Label

SAPX gives our clients the freedom to choose between using SAPX's shipping label or client shipping label. However, If you prefer to use your own shipping label format, please include the following information to your shipping label to ensure SAPX ops can process your package

The image shows a sample SAPX shipping label. It features the SAPX logo at the top left. The label is divided into several sections. A red box highlights the 'REG' field with the value 'DEV-DEV'. A green box highlights the 'PAKET' field with the value 'Rp.0'. The 'KREDIT' field is empty. The 'PAKET' section contains a barcode and the text 'PDG_PADANG'. The 'KREDIT' section contains the text 'PENGIRIM : [DEV000] - FAUZI FITRI', 'TGL PU : 18-1-2022', 'No Reference : PDG_PADANG', 'Pieces/Ulm. Satuan : 1', 'Weight/Berat : 1', and 'Deskripsi Brg : AWB TEST'. The 'Instruksi Khusus' section contains the text 'Jangan Dibanting'. The 'TUJUAN' section contains the text 'TUJUAN : I NYOMAN ARTIKA', 'TELEPON : 081300000000', 'JALAN TUKAD', 'BATANGHARI 88', and 'PANJER-DENPASAR SELATAN'.

			
REG		PAKET	KREDIT
2 DEV-DEV	PENGIRIM : [DEV000] - FAUZI FITRI		
3 Rp.0	TGL PU : 18-1-2022		
	No Reference : PDG_PADANG		
	Pieces/Ulm. Satuan : 1		
	Weight/Berat : 1		
	Deskripsi Brg : AWB TEST		
Instruksi Khusus : Jangan Dibanting		TUJUAN : I NYOMAN ARTIKA TELEPON : 081300000000 JALAN TUKAD BATANGHARI 88 PANJER-DENPASAR SELATAN	

Note

- Airwaybill number and Barcode (128)
- SAPX TLC code, which can be found in order request response. For further details please refer to request/create order endpoint
- The amount that SAPX courier needs to collect from the consignee

Insurance

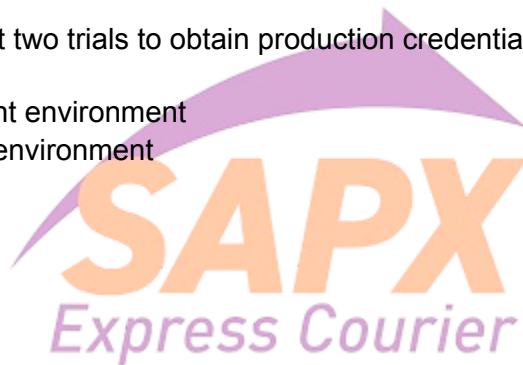

SAPX also has policies regarding package insurance. The standard insurance policies in SAPX are as follows :

1. The goods value < (less than) 250.000 rupiah cannot be insured
2. The goods value > (greater than) 500.000 rupiah must be insured

Condition

SAPX have conditions that the client must follow to integrate their system to SAPX system. These conditions as follows :

1. Client must complete the integration form which is provided as a google form and will be shared by our team
2. Client must conduct two trials to obtain production credentials. The trial will be conducted in 2 environments :
 - Development environment
 - Production environment

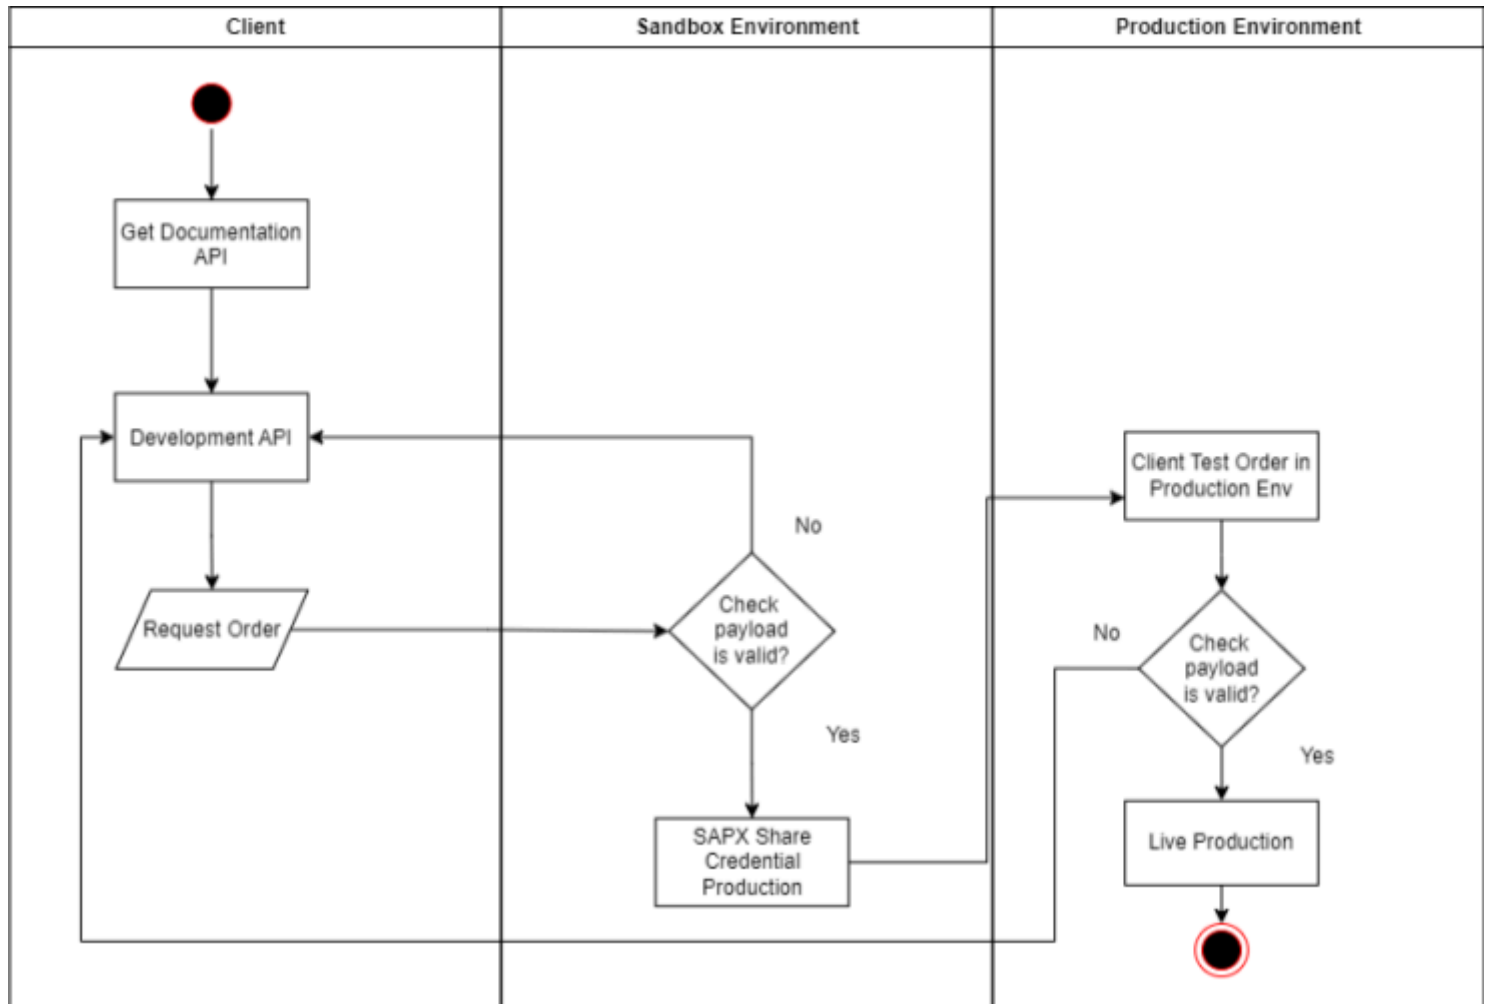

Disclaimer:

The above policies and conditions may change in the future in accordance with SAPX's terms of use. Please discuss with SAPX PIC sales if you need further details.

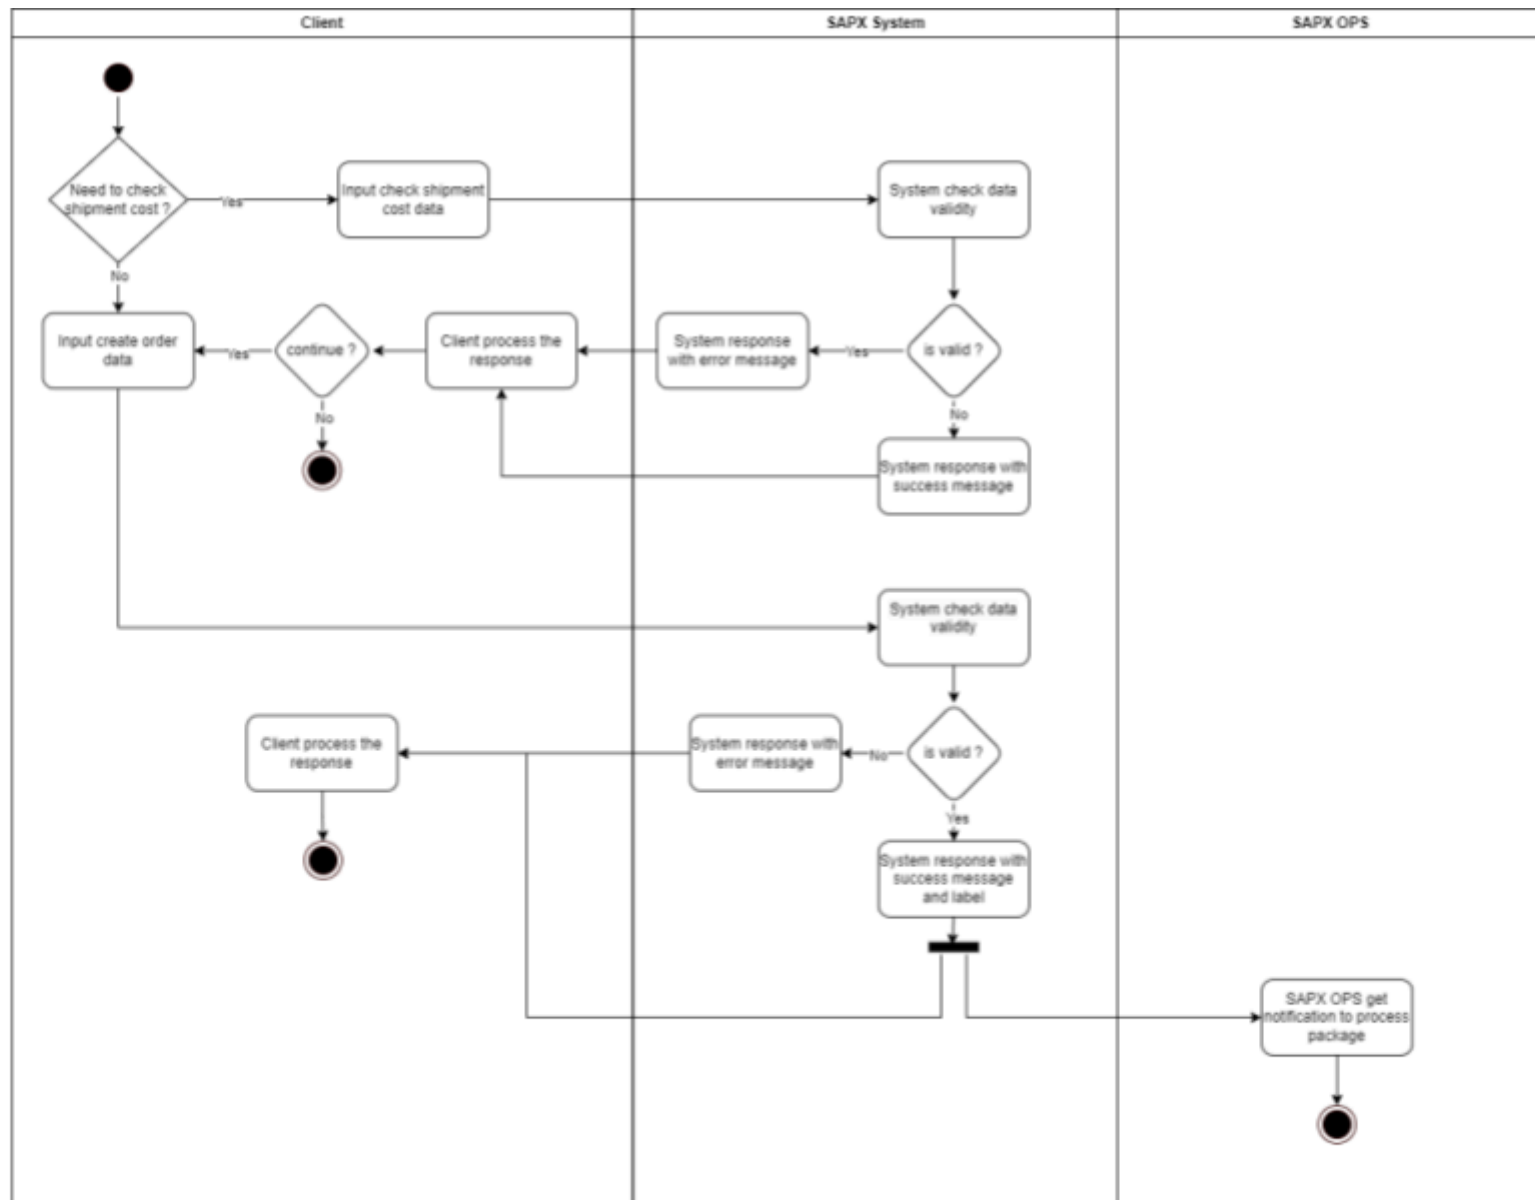

Diagram

We have 2 diagram to give you a picture about the integration and creating and order

Integration Diagram

Request/Create Order Diagram

Host and Credentials

The following are credentials and host can used for trials on SAPX development server.

Host

Host Staging : <https://apisandbox.coresyssap.com/>
Host Production : <https://api.coresyssap.com/>
Host Tracking Production : <https://track.coresyssap.com/>

Credentials

API KEY (development)

- DEV_m4rK3tPlac3#_2019 (*courier assigment*)
- DEV_wareHous3#_2019 (*drop off / handover*)

Customer Code (development):

- DEV001 (COD Account)
- DEV000 (NON COD Account)

NOTE :

Production credentials will be provided after you successfully complete create/request order or tracking trial on our development server.

API Endpoint

The following are endpoints that SAPX have.

Get Coverage Area

Method	: GET
Endpoint	: v2/master/district/get

This endpoint will provide you the information of SAPX coverage area.

Key	Value	Is Mandatory ?
api_key	<API KEY>	Yes
Content-Type	Application/json	Yes

Params

Key	Is Mandatory ?	Description
provinsi_name	No	Valid province name of indonesia
city_name	No	Valid city name of indonesia
district_name	No	Valid district name of indonesia
provinsi_code	No	Valid province code of Indonesia based on SAPX data
city_code	No	Valid city code of Indonesia based on SAPX data

Disclaimer: The coverage area is subject to change. Any changes will be implemented on the 10th day of the month.

Success Response :

```
{
  "status": "success",
  "msg": "",
  "data": [
    {
      "city_code": "JK11",
      "district_code": "JK11",
      "district_name": "JAKARTA UTARA",
      "zone_code": "ZBJK1101",
      "provinsi_code": "JK",
      "city_name": "JAKARTA UTARA",
      "tlc_branch_code": "JUA",
      "provinsi_name": "DKI JAKARTA"
    }
  ]
}
```

Failed Response :

```
{
  "status": false,
  "error": "Invalid API key "
}
```

Get Shipment Content Type

Method	: GET
Endpoint	: v2/master/shipment_content/get

This endpoint provides information about the available content types for the packages you will send to SAPX.

Headers

Key	Value	Is Mandatory ?
api_key	<API KEY>	Yes
Content-Type	Application/json	Yes

Params

Key	Is Mandatory ?	Description
Shipment_type_code	No	You can define if the type of package that you send is document or parcel (package)

Success Response :

```
{
  "status": true,
  "data": [
    {
      "shipment_type_code": "SHTDC",
      "shipment_content_code": "SHTDC",
      "shipment_content_name": "DOKUMEN"
    },
    {
      "shipment_type_code": "SHTPC",
      "shipment_content_code": "SHTPC",
      "shipment_content_name": "PAKET"
    }
  ]
}
```

Failed Response :

```
{
  "status": false,
  "error": "Invalid API key "
}
```

Get Shipment Cost Publish

Method	: POST
Endpoint	: v2/master/shipment_cost

This endpoint provides information about shipment cost. Client can choose how the cost is displayed using the following configuration.

1. SAPX Website. This option returns the shipment cost as displayed on the SAPX website
2. Publish + Discount. This option returns the published shipment cost minus the discount specified in your contract agreement
3. FRP. This option returns the shipment cost as specified in your contract agreement

For further details, please contact the developer

Headers

Key	Value	Is Mandatory ?
api_key	<API KEY>	Yes
Content-Type	Application/json	Yes

Body Raw

```
{
  "origin": "DEV",
  "destination": "DEV",
  "weight": 1,
  "customer_code" : "DEV000",
  "packing_type_code" : "ACH02",
  "volumetric" : "1x1x1",
  "insurance_type_code" : "INS01",
  "item_value" : "1000000"
}
```

Detail Parameter

Key	Is Mandatory	Description
origin	Yes	The SAPX origin district code
destination	Yes	The SAPX destination district code
weight	Yes	The weight of the package in kilograms (kg)
customer_code	Yes	The SAPX registered customer code
volumetric	Yes	The volume of package in centimeters (cm)
packing_type_code	No	The SAPX packing type code. The code can be found in the below table
insurance_type_code	No	The SAPX insurance type code. The code can be found in the below table.
item_value	No	The value of package in rupiah/idr. You should provides this value if the package is insured

Packing Type Code :

Packing Type Code	Packing Type Name
ACH02	Packing Kayu
ACH03	Packing Kardus Rokok
ACH04	Packing Full
ACH05	Packing Buble
ACH06	Packing Kardus Mineral

Insurance Type Code :

Packing Type Code	Packing Type Name
INS01	Asuransi TMT Paket
INS02	Asuransi TMT Dokumen Berharga

Success Response :

```

}
```

Detail Parameter

Field	Is Mandatory ?	Type Length	Sample Values	Description
customer_code	Yes	String(50)	DEV000	The registered customer code in SAPX System
awb_no	No	String(20)	AWB-TRACK-01	Airwaybill number to track the package. Special characters allowed are only dash (-) and underscore (_)
reference_no	Yes	String(20)	REF-TRACK-01	Document/Order Number that unique. Special characters allowed are only dash (-) and underscore (_)
pickup_name	Yes	String(100)	Abdur	Pickup name
pickup_address	Yes	String(200)	Jl. Komodor Halim Perdana Kusuma No.28, Halim Perdana Kusumah, Kec. Makasar	Pickup address
pickup_phone	Yes	String(20)	62822806611	The PIC/Pickup phone number
pickup_place	Yes	Int(5)	1	Set it to 1 for pickup, or 2 for drop off
pickup_email	No	String(50)	abdur@gmail.com	Pickup email
Pickup_postal_code	No	Int(5)	13610	Pickup Postcode
Pickup_contact	No	String(100)	Abdur	PIC/Pickup Name
Pickup_latitude	No	String(50)	-62.670.275	Pickup latitude coordinate
Pickup_longitude	No	String(50)	106.881.132	Pickup longitude coordinate
Pickup_district_code	Yes	String(6)	JK1007	SAPX district code for pickup

expected_pickup_date	No	Timestamp	2025-01-01 10:00:01	Expected pickup date in GMT+7 Format
Service_type_code	Yes	String(6)	UDRREG	SAPX service type code
Koli	Yes	Int(9)	1	The number of cartons/package
Weight	Yes	Int(9)	1	Weight of goods (kilograms)
Volumetric	Yes	String(50)	1x1x1	Volumetric of goods
Shipment_type_code	Yes	String(5)	SHTPC	Type of package
Shipment_content_code	Yes	String(5)	SHTPC	Type of contents inside package
Shipment_label_flag	No	Int(1)	1	Set this to 1 if a label is needed, or 0 if it is not.
Description_item	No	String(200)	A pair of shoes and clothes	Description of the contents/items inside the package
Packing_type_code	No	String(5)	ACH04	SAPX packing type code
Item_value	No	Float	50000	Goods value, You must provide this data if the package is insured
Insurance_type_code	No	String(10)	INS01	SAPX insurance type code
Cod_value	No	Float	75000	COD amount, You must provide this data if the type of shipment is COD
Shipper_name	Yes	String(20)	Abdur Shop	Shipper name
Shipper_address	Yes	String(200)	17, Jl. Buluh Perindu Raya No.8, RT.17/RW.6, Pd. Bambu, Kec. Duren Sawit	Shipper address

Shipper_address_2	No	String(200)	17, Jl. Buluh Perindu Raya No.8, RT.17/RW.6, Pd. Bambu, Kec. Duren Sawit	Extra shipper address
Shipper_address_3	No	String(200)	17, Jl. Buluh Perindu Raya No.8, RT.17/RW.6, Pd. Bambu, Kec. Duren Sawit	Extra shipper address
Shipper_phone	Yes	String(20)	628128537342	Shipper phone number
Shipper_email	No	String(50)	abdur@ashop.com	Shipper name
Shipper_postal_code	No	int(5)	13450	Shipper postcode
Shipper_contact	Yes	String(100)	Abdur	PIC/Shipper name
Destination_district_code	Yes	String(6)	JK1004	SAPX district code for destination
Receiver_name	Yes	String(100)	Jason	Recipient name
Receiver_address	Yes	String(200)	P3HV+58M, Jl. Raya Imam Bonjol, Sukadanau, Kec. Cikarang Barat	Recipient address
Receiver_address_2	No	String(200)	P3HV+58M, Jl. Raya Imam Bonjol, Sukadanau, Kec. Cikarang Barat	Extra recipient address
Receiver_address_3	No	String(200)	P3HV+58M, Jl. Raya Imam Bonjol, Sukadanau, Kec. Cikarang Barat	Extra recipient address
Receiver_phone	Yes	String(20)	628188372069	Recipient phone
Receiver_email	No	String(50)	jason@gmail.com	Recipient email

Receiver_postal_code	No	Int(5)	17530	Recipient postcode
Receiver_contact	Yes	String(100)	Jason	Recipient name
Receiver_address_2_1	No	String(200)	Jl. H. Usmar Ismail, Kota Jababeka Cik arang, Bekasi, 17550	Alternative receiver address
Receiver_address_2_2	No	String(200)	Jl. H. Usmar Ismail, Kota Jababeka Cik arang, Bekasi, 17550	Extra alternative receiver address
Receiver_address_2_3	No	String(200)	Jl. H. Usmar Ismail, Kota Jababeka Cik arang, Bekasi, 17550	Extra alternative receiver address
Special_instruction	No	String(100)	Handle with care	Special instruction for package
Return_district_code	No	String(5)		SAPX district code for return (optional)
Return_address	No	String(200)	17 Jl.aya No.8, RT.1/RW.6, Pd. Bambu, Kec. Duren Savit	Return address (optional)
Return_phone	No	String(20)	628128537342	Return phone (optional)
Return_contact	No	String(100)	Abdur	Return name (optional)

Disclaimer: *return_district_code*, *return_address*, *return_phone*, and *return_contact* should only be provided if the return address is different from the pickup/origin address.

Success Response :

```
{
  "status": "success",
  "data": {
    "awb_no": "AWB-APIV2-200",
    "reference_no": "AWB-APIV2-200",

}
```

Failed Response

```
{
  "status": "fail",
  "msg": "REFERENCE NO. SUDAH ADA. MOHON GANTI DENGAN YANG LAIN."
}
```

Cancel Order

Method	: POST
Endpoint	: v2/shipment/pickup/cancel

This endpoint is used to cancel the order that has been created

Header

Key	Value	Is Mandatory ?
api_key	<API KEY>	Yes
Content-Type	Application/json	Yes

Body Raw

```
{
  "awb_no": "JSA1500127659495",
  "desc": "Pengirim tidak jadi mengirim barang",
  "reason_detail_code": "GLD004"
}
```

Success Response :

```
{
  "status": "success",
  "msg": "Cancel Order berhasil di lakukan pada tanggal dan jam [2023-05-22 09:31:46]"
}
```

Failed Response :

```
{
  "status": "fail",
  "msg": "Fail, AWB yang ingin dicancel tidak ditemukan."
}
```

Disclaimer : Order cancelation can only be requested before the package reaches ENTRI VERIFIED status

Get Tracking Order

Method	: GET
Endpoint	: v2/shipment/tracking

This endpoint provides you information about the package journey. You can track the package using either awb number or reference number

Headers

Key	Value	Is Mandatory ?
api_key	<API KEY>	Yes
Content-Type	Application/json	Yes

Params/Query Parameter

Key	Description
awb_no	Use these params to track based on awb number
reference_no	Use these params to track based on reference number

SAPX
Express Courier

List of Response

The following is list of response from SAPX API.

No	HTTP Code	Status	Description
1	400	fail	The requested data already exists on our server
2	401	fail	Authorization or authentication has failed
3	404	fail	The requested data was not found in our system
4	422	fail	Missing required parameter(s)
5	500	fail	Internal server error or bad gateway on our side
6	200	success	The data request has been successfully received

List of Services

The following is list of services offered by SAPX. Please note that some of services may not be available in certain regions. For further details, please contact SAPX Sales PIC.

No	Service Name	Service Type	Description
1	REG	UDRREG	REGULER
2	ODS	UDRONS	ONE DAY SERVICE
3	SDS	UDRSDS	SAME DAY SERVICE
4	DRGREG	DARAT	REGULER DARAT/CARGO

List of Checkpoint

The following is list of checkpoints that SAPX uses in every process of shipping goods

No	Checkpoint Name	Description
1	ENTRI (SEDANG DI PICKUP)	KURIR SEDANG MENJEMPUT PAKET
2	ENTRI (PENDING PICKUP)	PICK UP DIJADWALKAN KEMBALI
3	ENTRI (SEDANG PICKUP ULANG)	KURIR SEDANG MENJEMPUT ULANG PAKET
4	PICKED UP	PAKET TELAH DIPICK UP OLEH KURIR
5	VOID	PAKET TELAH DIBATALKAN
6	VOID_PICKUP	PROSES PICK UP TELAH DIBATALKAN
7	ENTRI VERIFIED	VERIFIKASI PAKET
8	MANIFEST OUTGOING	KELUAR DARI [KANTOR ASAL]
